

*Honors Chemistry - Topic III Outline*  
**Atoms - The Building Blocks of Matter**

**I. Basic Atomic Structure**

- A. Early Concepts: Greek & Roman pp. 73; 78-79; 100; 81-85; 206-207
- B. Beginnings of The Modern Model
1. Mathematical nature of matter
  2. Dalton's atomic model
- C. Composition of The Atom
1. Matter's electrical connection
    - a. anode/cathode rays; photoelectric effect
    - b. Faraday and electrolysis
  2. Electrons: Thompson and Millikan
    - a. discovering the electron & its charge
    - b. Thompson's atomic model
  3. The Nucleus: Rutherford
    - a. discovery of radioactivity; types of radiation
    - b. Rutherford's experiment
    - c. Rutherford's atomic model
- D. Typical Atomic Properties
1. Atomic sizes
  2. Atomic number; Moseley
  3. Atomic masses
    - a. relative mass scale
    - b. isotopes
    - c. average isotopic mass; calculations

**II. Bohr Model of The Atom**

pp. 303-312

- A. The Nature of Light
1. Types of spectra
  2. Concepts of light
    - a. light as a wave
    - b. light as a particle
    - c. electromagnetic spectrum
  3. Quantizing line spectra: Rydberg Equation
- B. The Bohr Atomic Model
1. Explaining the existence of line spectra
  2. Energy-level diagram and quantum numbers
  3. Electron configurations

### **III. Modern Atomic Structure**

- A. Changing Bohr's Model p.312-318; 319-327; 352
  - 1. Duality of matter: DeBroglie
  - 2. Heisenberg's Uncertainty Principle
  - 3. Matter-Waves: Schroedinger's wave concept
  
- B. Describing The Modern Atom
  - 1. Quantum numbers
  - 2. Atomic orbitals
    - a. shapes of orbitals
    - b. Pauli Exclusion Principle
  - 3. Electron configurations
    - a. Aufbau Principle
    - b. Hund's Rule
    - c. electron blocks and the periodic table
    - d. Lewis dot structures

### **IV. Basic Nuclear Chemistry**

- A. Nuclear Stability p.582-600
  - 1. Stable zone
  - 2. Half-life
  
- B. Nuclear Reactions
  - 1. Common nuclear particles
  - 2. Natural decay
  - 3. Fission & fusion
  - 4. Writing/balancing nuclear equations
  
- C. Uses of Radioactive Materials
